

A top-down view of a petri dish containing a blue agar medium. The surface is covered with various bacterial colonies, including small white dots, larger yellow spheres, and a prominent orange, fuzzy mass in the upper left. A rectangular, light-brown paper label is placed diagonally across the center of the dish. The label has the text "SALMONELLA INFECTION" printed in black, sans-serif, uppercase letters. To the right of the text, on the label, is a square QR code. The petri dish is set against a solid blue background.

SALMONELLA INFECTION
