

Resource Management Agency  
ENVIRONMENTAL HEALTH DIVISION

**MEMORANDUM**

**To:** Arnulfo Carbajal

**From:** Sandy Murray

**Date:** 10/28/2015

**Subject:** Chronology of Chipotle Mexican Grill Chipotle Mexican Grill (FA#19771 located at 1263 Simi Town Center Way, Simi Valley, CA) Foodborne Illness Outbreak investigation

---

1. Thursday, August 20, 2015 - CEO's Office received an email on Thursday, August 20, 2015 9:36 PM from [REDACTED] (parent) alleging of an FBI outbreak at Chipotle Mexican Grill in which his daughter along with a group of 16 students alleged they ate at Chipotle Mexican Grill on August 18, 2015 and became ill with one hospitalized.
2. Friday, August 21, 2015 – This Division was first notified of an FBI outbreak on Friday, August 21, 2015 at 3:14:52 PM through an email which was forwarded from the CEO's office.
3. Saturday, August 22, 2015, the Division received a phone messaged of an alleged FBI outbreak and its second public complaint. There was an article in the news from Saturday, as reported by CBS news of the outbreak.
4. Saturday, August 22, 2015, received a phone message from Chipotle corporate office dated Saturday, August 22, 2015 that Chipotle corporate representative who stated that the food facility had (17) sick employees and subsequently the entire facility crew had been replaced as of 8/22/15 with temporary staffing.
5. Sunday, August 23, 2015, Division received a third FBI complaint. A phone messaged had been left in the Divisions main phone line.
6. Monday, August 24, 2015, at 8:30 AM, Division contacted Theresa Harrison, Public Health Department Nurse, who had no knowledge of the outbreak.
7. The following is a summary of the FBI investigation:

October 28, 2015

- Division generated a total of 10 complaints involving at least 21 victims. S. Murray is in charge of contacting and interviewing all complainants via the EHD phone and internet complaint system.
  - M. Byrne made the initial contact with the Chipotle corporate representative, Roslyn Stone at [REDACTED]. Per Ms. Stone, Chipotle has been receiving complaints from guests the past weekend and as a result of employee illness and customer complaints, this location was voluntarily closed on Friday and reopened on Saturday. Upon reopening on Saturday, all crew members were replaced by new members from nearby location and the facility was thoroughly cleaned and sanitized and all food items were destroyed. Ms. Stone also provided a list of 17 ill employees and a list of 74 ill guests as of 8/24/15 PM to EHD.
  - EHD attempted to contact ill employees and was able to contact 7 of the 17 as of the end of 8/24/15 and will continue to interview all food workers.
  - Public Health nurse has been randomly contacting the guest list provided by Chipotle Corporate Office.
8. Monday, August 24, 2015 the field foodborne illness investigation and a routine was conducted by Ramesh Bassiri. The manager was aware of 46 complaints that were received by the corporate office.
9. Tuesday, August 25, 2015 eight additional complaints with 9 ill guests. As of today there are a total of 18 public complaints encompassing at least 30 ill guests which have notified the Division. Chipotle has stated they have received 94 ill guest complaints.
10. Tuesday, August 25, 2015, 11 of the 17 ill employees have been contacted and interviewed by this Division, most are currently symptom free. There is no confirmation yet as to what etiologic agents might be the cause of the outbreak.
11. Wednesday, August 26, 2015, an interdepartmental conference call held and participants were (EHD: B. Huff, A. Carbajal, S. Murray, B. Stratton; PH: T. Harrison, E. Archer and R. Levin). Testing all ill food employees was determined to be the top priority. From the conference call, it was agreed that EHD would take over interview of all ill guests from the original list provided by Chipotle Corporate Office and would assist PH in providing containers and delivering of stool samples in coordination with the food facility and the lab.

October 28, 2015

12. Thursday, August 27, 2015, EHD staff picked up sample containers and delivered them to Chipotle Simi location.
13. Friday, August 28, 2015, EHD staff picked up containers at the lab and dropped off containers at the food facility and delivered collected stool samples to the PH lab when available.
14. Saturday, August 29, 2015, received notification via a phone call from Ventura County Public Health of five positive results for Norovirus and they were:

One customer was also confirmed with Norovirus.

As a result, EHD on-call staff (Holly Sincalir) issued exclusion notices of these four employees to the food facility on 8/29/15.

The following employees were clear to return to work based on the test results on 8/29/15:

15. Tuesday, September 1, 2015, two employees tested positive for Norovirus: [REDACTED]  
[REDACTED] Exclusion notices issued for both employees on 9/1/15. [REDACTED] also worked at Panda Express located at 153 Cochran Street Simi Valley) and was excluded from this facility as well.

The following employees were clear to return to work based on the test results on 8/29/15 and 9/1/15:

16. Wednesday, September 2, 2015, EHD staff continue to pick up containers at the lab and drop off containers at the food facility and deliver collected stool samples to the PH lab when available.

October 28, 2015

17. Thursday, September 3, 2015, Employee, [REDACTED] tested positive for Norovirus and subsequently excluded on September 4, 2015.
18. Tuesday, September 8, 2015, [REDACTED] received two negative test results (9/3/15 & 9/4/15) and his exclusion notices were rescinded from both food facilities by EHD staff.
19. Wednesday, September 9, more samples were delivered to the lab by EHD staff and Chipotle's own representative.
20. Thursday, September 10, 2015, [REDACTED] received two negative test results (9/9/15) and his exclusion notice was rescinded by EHD staff.
21. Friday, September 11, 2015, Notice of Exclusion issued for [REDACTED] who was tested positive for Norovirus. [REDACTED] works at Chipotle in Oxnard and has been excluded by Chipotle Corporate Office per Area Manager, Sam aka Wissam Y Fakhreddine. [REDACTED] received her second negative test result and her exclusion notice was rescinded by EHD staff.
22. September 15, 2015, two more previously excluded employees, [REDACTED] and [REDACTED] received their second negative test result and their exclusion notices were rescinded by EHD staff.
23. September 17, 2015, two more previously excluded employees, [REDACTED] and [REDACTED] received their second negative test result and their exclusion notices were rescinded by EHD staff.
24. September 23, 2015, [REDACTED] received two negative test results and her exclusion notice was rescinded on 9/23/15 at the Simi location and on 9/24/2015 at the Oxnard location.
25. As of 9/25/2015, all previously excluded employees had been clear to return to work.

EHD had received a total of 46 public complaints from 8/24/2015 to 9/21/2015 at this Chipotle location. Of the 46 complaints, two were duplicate complaints and one was unrelated to this outbreak investigation since the complainant's alleged complaint dated back in June, 2015. Of those complaints, a total of 154 customers allegedly reported sick and 27 were not sick. Of the **154 ill customers, two were as a result of a secondary infection** since they didn't eat at the facility but were sick following their family members who were Chipotle customers.

EHD also contacted all complainants from the Chipotle Corporate ill guest list obtained on 8/24/15. After screening duplicate complaints (complainants filed

October 28, 2015

complaints with both EHD and Chipotle Corporate office), an addition total number of 71 customers were contacted by EHD which resulted an additional of **63 ill** customers and **8 not sick** customers.

A total number of **ill employees was 17** and EHD ordered those employees to submit stool samples which confirmed 9 employees with positive results. As a result, 8 employees were excluded. One former employee, [REDACTED] was excluded by Chipotle initially on 8/21/15 who never returned to work there and had since resigned.

Therefore, the total number of reportedly ill customers and employees at this Chipotle outbreak investigation is 234 (154 + 63 + 17) as of 9/25/2015.

In reviewing the food logs provided by Chipotle for both 8/18/15 and 8/19/15, it is estimated at least 1500+ entrees were sold each day. Thus, the actual number of customers and employees ill from this outbreak is likely to be substantially higher than the reported number of 234.
